Re: NYC Data Science

(GA-OUTCOMES JOB DESCRIPTION:)Collect and analyze business-critical data; identify key prediction problems; build data models; conduct data aggregation and regression; use Pandas and SciKit and algorithms to identify data patterns; implement data strategies; analyze strategy performance; build software with JAVA (or C/C++); deploy software; debug software errors; write design documents; mold product direction through data modeling and machine learning; use SQL, Python (or Matlab), & UNIX. Master of Science in Mathematics, Physics, or Statistics plus 6 months experience in job offered. Fax resume to HR Manager, Dstillery,

Congratulations to you and your team at Dstillery on being a finalist in Digiday's Best Audience Management Platform category! That's great recognition from the marketplace. It is your proven track record of excellence such as this that interests me in your company. (GA-OUTCOMES: http://www.marketwired.com/press-release/digiday-signal-awards-names-dstillery-as-finalist-best-audience-measurement-platform-2143585.htm)

I'm excited to apply to NYC Data Scientist position advertised on your website. I am well qualified for the required tasks. My recent completion of the General Assembly Data Science Immersion course has instilled a strong fundamental skillset in both Pandas and SciKit. Skills well suited for identifying patterns and implementing data strategies.

My enthusiasm for pursuing a career in this area stems from my interest in merging past experience in marketing and technical development, and my desire to make full use of my skills in assessing and guiding iinformed business decisions.

I would welcome the opportunity to discuss my application with you and look forward to hearing from you.

Yours sincerely,

JP Freeley
